Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The drawings were received on 01 September 2004. These drawings are acceptable.
2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 11-13, 16, and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Douglass et al in view of Avila. These claims are considered met by the embodiment of Figure 2 of Douglass et al except for a second spring. It would have been obvious in view of spring 60 of Avila to provide a spring for the inlet ball 64 in the embodiment of Figure 2 of Douglass et al so as to provide an additional spring bias in addition to the fluid pressure bias on the ball 64 of Douglass et al so as to return the inlet ball 64 to a closed position in the event of failure of inlet pressure, or to provide a bias to compensate for the weight of the valve elements in the event that the valve is utilized vertically with the inlet port at the bottom.
4. Claims 14-15, 19-20, and 22-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Douglass et al in view of Avila as applied to claims 11, 16, and 21 above, and further in view of Anderson et al. These claims are considered met as above except for flutes. It would have been obvious in view of the guide flutes shown for balls 20 and 22 in Figures 3 and 4 of Anderson et al to provide guide flutes for the

Art Unit: 3753

balls of the embodiment of Figure 2 of Douglass et al so as to provide for positive guidance of the balls.

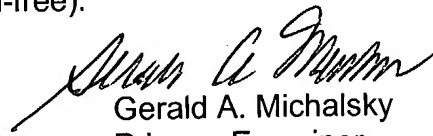

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
